Alternatives for approach service provision due to primary and secondary radar, Mode S, unserviceable.

The Comisión Ejecutiva Portuaria Autónoma (CEPA) notifies Commercial Aviation, General Aviation, Air Operators, Aviation Schools, and personnel involved in aeronautical activities that:

The primary and secondary radar, Mode S, at El Salvador International Airport San Oscar Arnulfo Romero y Galdámez (AIES-SOARG), will be unserviceable due to maintenance from 08:30 hours (local time) on february 24th until 23:59 hours (local time) on march 24th, 2025. The provision of approach surveillance service will be carried out through the integrated surveillance signals of COCESNA and ADS-B.

In the event of a failure of COCESNA's Integrated Signals, approach control service will be provided through procedures, and ADS-B will be used only as a reference to observe the current air traffic situation.
